(Discounted repair/replacement parts additional.)
✓			Maximum 'Efficient Water Usage' Plan. <i>We highly recommend these 2 Mid Season Check-Ups.</i> <ul style="list-style-type: none"> • 2 Mid Season Checks ensuring peak efficiency throughout the season. • Allows for 2 Controller timing adjustments allowing for seasonal weather changes. • Both Mid-Season Check-Ups include up to 1/2 hour of labor and mobilization. (Discounted repair/replacement parts additional)

FREE ROTOR HEAD

**Mickman
Brothers**
Inc.
Landscapes for Living®

Including installation!

With our Platinum, Gold or Silver Plan Options*

- **Conserve Water**
- **Save Money**

Do your sprinkler heads operate like this?

Take advantage of one of our 3 Service Plan Options* and receive a **FREE** Irrigation Rotor Head installed in a location of your choosing.

Why? The new 'Rain Curtain' technology of our rotor heads waters turf more efficiently than older heads or other head designs. If your new rotor head is performing better than your old rotor heads, we may recommend to change them out over the next year or two.

When? We'll install your new head at the time of your Spring Start-up

Please partner with us!

The Landscape Irrigation Systems in our community use the majority of the potable water each summer. Much of this water is wasted through the use of outdated equipment such as sprinkler heads, controllers and malfunctioning rain sensors.

Please partner with us to conserve our most valuable resource - WATER. By doing so you'll experience significant savings in your monthly water bills too!

* See opposite side for program option details for the benefits of each respective service plan.
